

Environmental Policy

SERVICE KING WILL....

1. Minimize waste in all parts of the business and aim to re-use or use renewable or recyclable materials and components and strive for zero waste wherever possible.
2. Avoid the unnecessary use of hazardous materials and processes and take all reasonable steps to prevent damage to either public or ecological health.
3. Reduce the use of water wherever possible and use environmentally friendly cleaning products when possible.
4. Monitor and manage our energy inputs.
5. Encourage use of new working systems, methods and equipment to continually improve our carbon footprint.
6. Expect similar environmental standards to our own from our suppliers, retailers and contractors and endeavor to instill and advise the same philosophy into our client's businesses.
7. Always embrace a life cycle assessment approach and take responsibility for our products and services.
8. Adopt an environmental standard vehicle program with the intention to introduce Hybrid vehicles to reduce the impact that staff travel has on people's health and that of the planet.
9. Assess on an on-going basis the environmental & social impact of all our processes and be efficient with all materials, supplies and energy.
10. Motivate our staff, contractors and their employees to get involved in environmental and local community projects on a regular basis.
11. Assist in developing solutions to environmental problems and support the development of environmentally and socially responsible public policies.
12. Ensure Service King and their associated partners has a long-term vision that it meets the needs of the present, without compromising the abilities of future generations to meet our own needs.
13. Implement the highest available environmental & social standards throughout New Zealand.
